## → Event Presentation

After nine successful editions, DECIELEC is recognised as the major event dedicated to embedded systems, energy management (generation & storage) and energy conversion.

Since its creation, more than 1 700 participants have benefited from its unique concept of face to face meetings:

- › Over 3 000 business meetings regarding embedded technologies as applied to rail, aeronautics / aerospace, automotive, naval and industry.
- › Conferences on future developments in embedded systems, energy conversion electronics and energy management systems.

## Who takes part?

**PRIME CONTRACTORS:** Purchasing Manager, R&D Director, Technical Director, Projects Manager, Design Office...

- ▶ Aeronautics / Aerospace
- ▶ Agricultural Machinery
- ▶ Armament
- ▶ Automotive
- ▶ Home appliances
- ▶ Industrial vehicles / equipment
- ▶ Medical equipment
- ▶ On-board communication
- ▶ Rail
- ▶ Renewable energies
- ▶ Urban & road transport
- ▶ Yachts...

## SUPPLIERS of embedded systems

- ▶ Batteries & energy storage
- ▶ Connectors
- ▶ Electric & electronics cabling
- ▶ Electronics components
- ▶ Electronic sub-contracting
- ▶ Embedded software
- ▶ Hardened industrial PCs
- ▶ Internet communication
- ▶ Optical fibre
- ▶ Photovoltaic collector & renewable energy
- ▶ Power electronics
- ▶ Real time network
- ▶ Study offices...

## → Our methodology:

### 1 - Your registration form:

Fill it in with a detailed description of your needs or skills.

### 2 - Technical catalogue:

The technical catalogue will be available on the Internet two to three weeks before the convention. It includes presentation fact sheets on prime contractors and suppliers, as well as the program of solution-oriented workshops and colloquia. You will be handed over a copy of this catalogue on your arrival at the convention.

### 3 - Your selection:

You can study the technical catalogue in order to select the companies you wish to meet on pre-scheduled appointments.

### 4 - Validation:

We submit the list of suppliers wishing to meet the prime contractors, for validation by them.

### 5 - Schedule:

A few days before the convention, you will receive your prescheduled appointment roster, including workshops and colloquia.

# New for *DéciElec* 2009

**Management and conversion of photovoltaic and other renewable energy.  
Focus on energy storage, battery, super capacitors...**

**Over three days, an international congress for power electronic  
and energy management systems**

→ **The 28<sup>th</sup> & 29<sup>th</sup> of April, alongside the Business Convention:**

Power conversion electronics and energy systems management together with their application to transport - rail, aviation, automobiles – as well as other industrial fields and habitat.

→ **The third day, the 30<sup>th</sup> of April, will address these themes  
from a more scientific angle :**

How to bridge the gap between research and industrial applications ?

## Positive feedback from the 9<sup>th</sup> edition of DECIELEC :

“The presence at the same time and place of suppliers, contractors and conference speakers who specialise in their respective spheres. This event allows numerous contacts in a short time period and at any time of the day”.

▶ **Christian ROUZIES, Engineer, Expert in onboard energy, CNES**

“The meeting of numerous business professionals : contractors and suppliers. Plenty of interaction with the best ratio between time and efficiency.”

▶ **Head of Project for an aeronautical manufacturer.**

“Meetings with companies that brought precise technical support, despite my initially thinking there was no immediate interest towards their sphere of business.”

▶ **Christian BONNEJEAN, Projeteur, TXCOM**

“Irreproachable organisation, especially at the level of meeting management and also the sending of time-tables by e-mail.”

▶ **Philippe GELIS, Electricity/Electronics Department Manager, PEUGEOT MOTOCYCLES**

“Very good adaptation of the convention to peoples’ needs”

▶ **Head of Supply in the rail sector**

→ **For 78% of participants,**  
more than four meetings will consist of a follow-up.

→ **84% of contractors**  
declared their wish to work with one or more of the suppliers they met during DECIELEC 2007.

→ **87% of suppliers**  
acknowledged that present contractors had valid long or medium term projects.

Located in the immediate vicinity of key users and manufacturers of embedded systems – ALSTOM Transport, AIRBUS, EADS, CEGELEC, SAFRAN, CONTINENTAL AUTOMOTIVE, THALES... DECIELEC is the event that will count in your industrial dynamic. Embedded systems are one of the specialties of the Midi-Pyrénées. It constitutes one of the major axes of development in the region, together with aeronautics and space.

**Organisers and partners:**

**ALSTOM**

**In collaboration with:**
